Strong and durable, Steel-Line garage doors are made in Australia for the harsh Australian conditions.

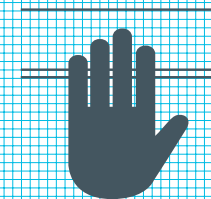

Steel-Line supports Australian jobs which is why our garage doors are predominately made with the highest quality Australian BlueScope® steel.

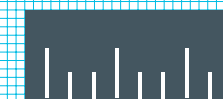

makers for

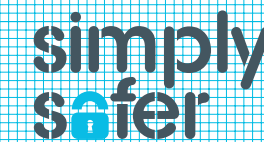

A trusted Australian brand, Steel-Line have been making garage doors for Australians by Australians for over 40 years.

Award-winning FingerProof™ Safety design is a standard feature for Steel-Line sectional doors.

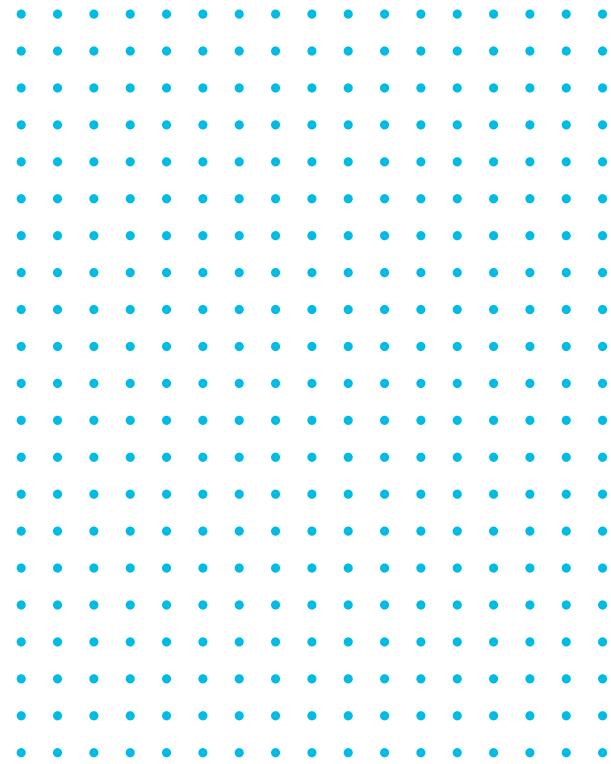

Every garage door is custom made and manufactured to your requirements. It's one of the reasons the majority of Australia's major builders choose Steel-Line garage doors.

Steel-Line offer a full range of accessories to suit your personal needs. View our range from page 57.

The garage door more Australians come home to every day.

Steel-Line have been makers and inventors of garage doors in Australia for over 40 years.

Strong, safe and durable, we make with passion to enhance your lifestyle. It's at the core of what we do.

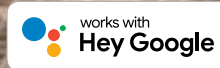

Our award-winning doors are the preferred choice for most major Australian builders.

Every door is custom manufactured for your home.

Do more with the Smarter Garage Door.

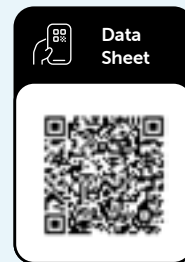

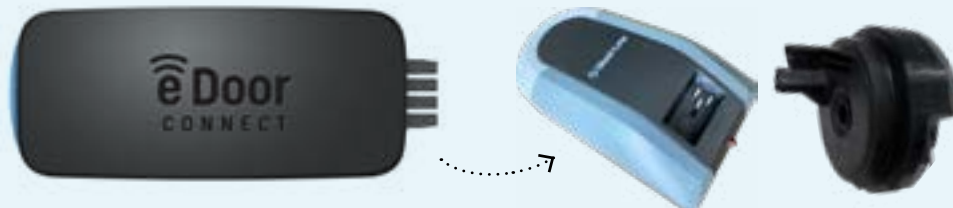

The smarter and safer way to open, monitor and share access.

Requires Zimi Cloud Connect and Wi-Fi Internet connection. Apple Home requires Zimi Matter Connect. Read the data sheet for system requirements.

Just plug it in.

E-Door Connect simply plugs into a compatible door motor. Setup is quick and simple.

- Compatible door motors.
- Product features.
- System requirements.

Anywhere.
Anytime.

Use your voice,
watch & phone.

Open the garage door

Did you forget to close the door?
No need to worry.

Accept a delivery every time.
Open the door remotely.

Share access with family and friends.
Easier than sharing keys.

Compatible with Photo Electric Beams.
Keep everyone safe.

Link your door with lighting.
Works with smarter switches.

Important: For your safety and the safety of others, we strongly recommend the use of a Photo Electric Beam with your E-Door Connect. A Photo Electric Beam is designed to detect an obstruction while the door closes and sends a signal to the opener to reverse or stop the door movement. If you do not already have Photo Electric Beams installed, please contact your local Steel-Line branch for a quotation to have them installed.

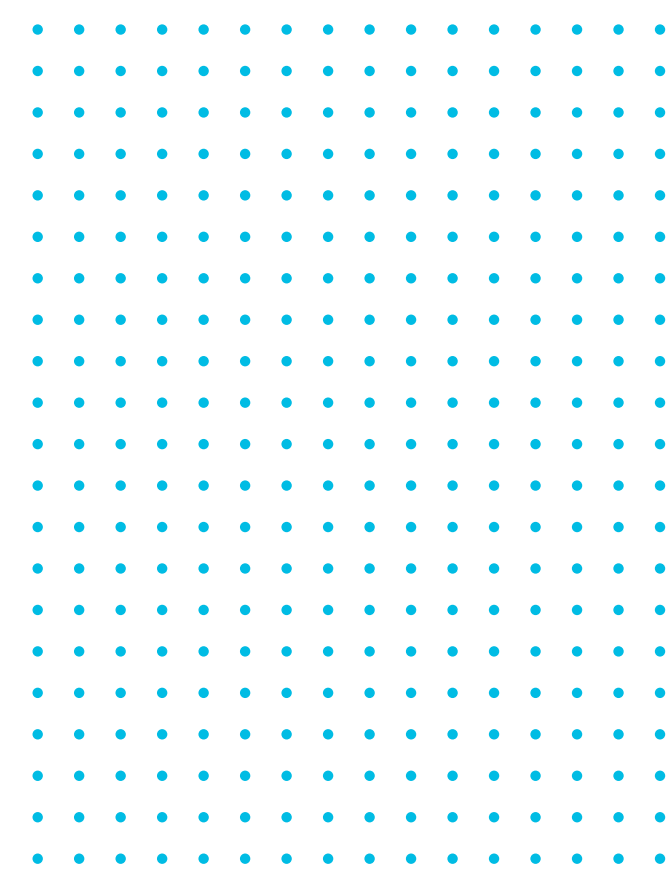

The Custom Collection

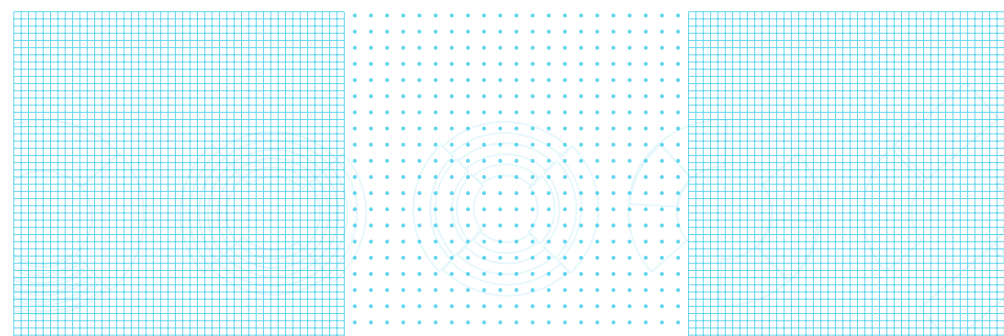

Your garage door could be the biggest design feature on your home's exterior, so make sure it's also the most striking. There's a Steel-Line product to suit all designs and architectural styles.

Steel-Line's innovative Custom Collection of garage doors offers over a hundred different options for you to choose from.

Let your imagination run wild with our Face Fixed, Insert Panel and Flush Mount selections. Simply match your garage door to the facade of your home and the style that will best suit your aesthetic.

**You create it,
we make it.**

Standard Insert Panel Options

NOTE: The number of panels is determined by the height of the opening <2440mm (H) = 4 panels; >2450mm (H) = 5 panels. The maximum width of the "1 section" door is 2400mm. The maximum width of the "2 sections" door is 4800mm. Outside of these configurations, check with your Product Consultant on price and availability. # The maximum width of the "1 section" Bar Grille Tube door is 1200mm. The maximum width of the "2 section" Bar Grille Tube door is 2400mm*.

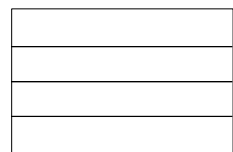

Custom Collection Face Fixed Aluminium Frame Garage Door with aluminium composite panels in Dark Grey.

Face Fixed Aluminium Frame Selection

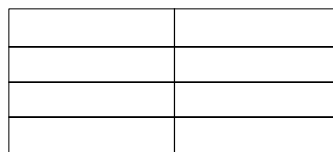

The face fixed design is laying the aluminium composite panels over the frame for that architectural look. The aluminium composite panels are the premier choice for an exterior cladding that will maximize the beauty of the structure while providing a sustainable product to prolong the life of the building.

Despite being conveniently lightweight, these aluminium composite panels certainly aren't pushovers. They have impressive durability and strength, making them well suited to bearing the tough conditions of the Australian climate. Our face fixed design is lightweight, weather-resistant, has a maximum wind rating of C3 for wind regions C and D in Australia.

this door.

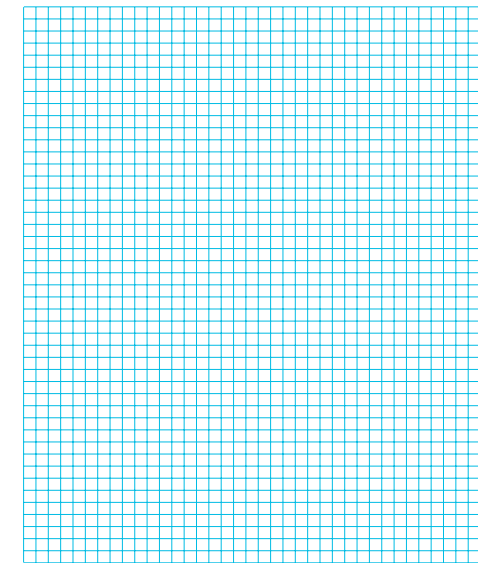

Custom Collection Sectional Flush Mount Door with vertical clad western red cedar.

Flush Mount Selection

Steel-Line's flush mount garage door blends in your facade with the cladding of your choice to create a seamless appearance to the front of your home. Flush finish means the surface of the garage door and the external wall surrounding it are on the same plane.

The flush mount garage doors are suitable to take a total weight of up to 175kg for tilt doors, and 250kg for sectional doors. They can be clad with the building's exterior materials, including timbers, composite timbers, metal, aluminium composite panel and acrylic. The integrated cladding materials make the door appear to be part of the building's wall system. Our flush mount doors are perfect for an architecturally designed building giving the exterior cladding a continuous look and essentially making the door invisible.

NOTE: All flush mount garage doors are made to order. Select a cladding material from our range or order as frame only and get your builder to clad on site to match the rest of your façade for that invisible look.

Colorbond® Roller Doors

Our range of Colorbond® colours and smooth operation, Steel-Line garage roller doors become true design features of your home.

Manufactured with heavy duty bottom rails containing durable PVC weather seals, a Steel-Line garage roller door provides your precious garage contents with excellent protection from the harsh elements.

All Steel-Line garage doors revolve on precision-made drum wheels. Garage doors are counter-balanced using helical coil springs to ensure perfect balance and operation. All our springs are heat treated and tempered to give years of trouble free operation.

“AA” series residential door and “B” series light industrial doors are now supplied with Aluminium guides as standard.

Aluminium guide benefits include:

- Lightweight
- Aesthetically appealing
- Smooth and quiet operation
- Effortless installation

The new Aluminium guide can be fitted with an optional brush seal, adding a level of protection against smoke, draughts, salt, light, dust, insects and bushfire embers.

Tilt Doors

Not enough room in your garage for a sectional or roller door? A lot of older garages can be quite limited in space.

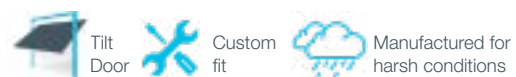

Steel-Line tilt garage doors offer the perfect solution for smaller garages or spaces with restricted side or head room. Manufactured to fit most garage openings and easily installed, the tilt garage door offers safety and convenience in a wide range of colours and materials.

The choices of material is almost as varied as your imagination allows and commonly includes plywood and moulding, K-panel, Colorbond®, Western Red Cedar, aluminium composite panels, copper sheeting, clear or textured glass/ acrylic, and many other types of cladding.

NOTE: Not all options available in all markets. Please refer to your Product Consultant for our wide variety of design options in your area.

INDEPENDENTLY TESTED
WIND LOADING AS/NZS 4505-2012

Louvre Doors

Steel-Line's aluminium Louvre sectional garage door has been developed to give a high level of airflow and natural light transmission.

Steel-Line sets a new benchmark for Louvre garage doors. Designed and manufactured in Australia, our Louvre garage door is extremely strong and secure with a modern architectural look. It's ability to provide privacy for what is inside and still allow a minimum 22% ventilation, makes this the door of choice for many modern developments.

Steel-Line Louvre garage doors have been engineered to the highest standard and tested at the JCU Cyclone Testing Station against the wind loading requirements of AS/NZS 4505-2012 (also available for C2 & C3).

The Timber Look Series

Your garage door is often the largest and most prominent frontal feature of your home. For this reason, choosing the right garage door is a crucial decision that can significantly influence the value and aesthetics of your most prized asset.

If you like the natural look and warmth that wood conveys, we can offer you Natural Timber, DecoWood®, Colorbond® and UniCote® LUX Timbers of the World.

Each offering has different benefits depending on your requirements, while providing the warm and homely charm that a timber look provides.

Our impressive assortment of beautifully crafted options offers a classic and timeless style that evokes a feeling of tradition with a modern twist.

The above is one of our Natural Timber Garage Doors with V joint profile.

You dream it, we create it.

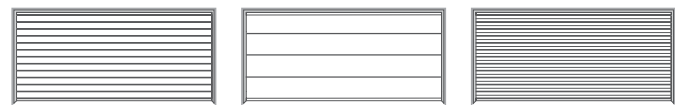

Timber Selection

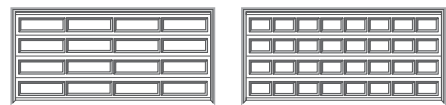

The DecoWood® garage door is ideal for coastal properties and bushfire prone areas with its marine grade powder coating. It is made from BlueScope® steel, which is an incredibly versatile material, preferred by builders and designers alike for its strength, durability, flexibility, lightness and corrosion-resistance.

Unlike timber, DecoWood® garage doors don't warp, shrink, splinter or rot. They require little maintenance, and they are also completely impervious to termites.

Colorbond®

Timber Selection

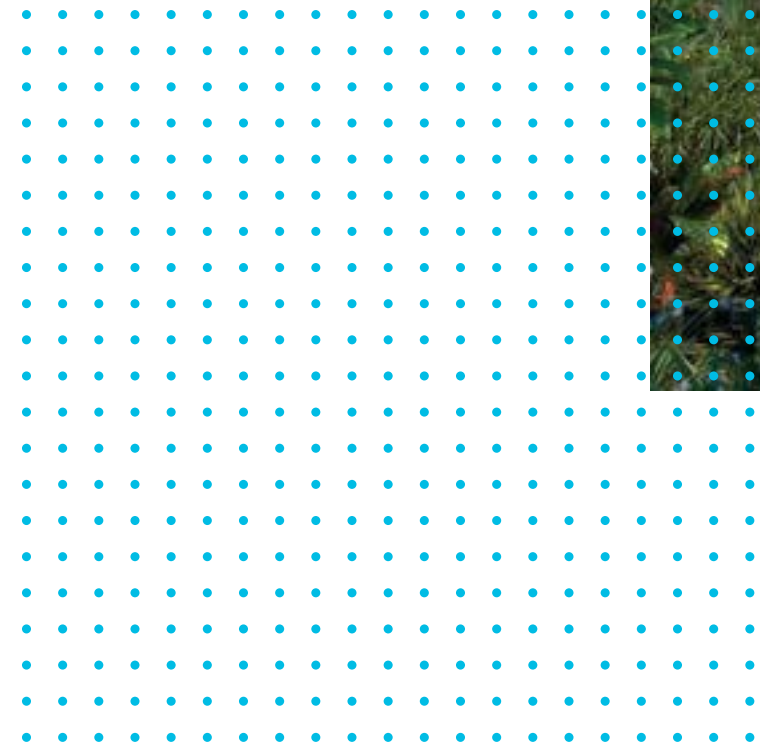

Steel-Line's Colorbond® Timber Selection offers the strength of a Colorbond® steel door with the style of the Colorbond® colours.

A garage door made from Colorbond® steel will also give you lifelong performance. Thanks to the five-layer design of Colorbond® steel, it provides corrosion resistance and a durable baked on paint finish, making it look great and easy to maintain.

With the Colorbond® Timber colours, Colorbond® steel provides an elegant twist providing even greater design opportunities for your home.

Natural Timber Selection

Stand out from the crowd with a door as unique as you.

As our timber garage doors are custom designed and manufactured, you can rest assured we will create a product to meet your dimensions and requirements. No matter what shape or size your garage is, a timber door can be made to suit it - and it will look fantastic.

And because this range is custom-built using natural products, you can look forward to having a truly one-of-a-kind garage door that has its own unique look and character.

The most popular timber used in this range is Western Red Cedar, a lightweight yet solid timber that looks equally beautiful on a renovated or new home being built.

Wind rated Slimline Sectional Garage Door in Colorbond® Surfmist

Wind Rated Doors

Stringently tested to meet wind load requirements.

Steel-Line wind rated garage doors have been engineered to the highest standard and tested against the wind loading requirements of AS/NZS 4505:2012.

Strut-Lock™ Wind Rated Sectional Garage Doors

The Strut-Lock door is post free, incorporating the use of heavy duty struts, robust commercial hinges, top brackets in combination with a unique stile reinforcement to provide maximum resistance to forces exerted by cyclonic and high winds up to 5.5m (also available for C2 & up to N4).

Wind Rated Wind Brace Sectional Garage Doors

The Wind Brace design feature with removable steel wind brace post(s) is installed to the sectional garage door once a cyclone warning is received. It takes about 2-5 minutes to install, and no tools are required. This feature can significantly enhance wind resistance up to C4 wind rating while still ensuring a smooth door operation (also available up to 6m for C2, C3, C4 & up to N6).

Wind Rated Roller Doors

The wind rated roller doors are designed to provide additional wind resistance in extreme weather conditions. The new Wind Rated roller doors have been designed to reduce noise and increase service life. Optimised to suit your requirements, the Wind Rated roller doors are suitable for homes, sheds, commercial and industrial warehouses in cyclonic and non-cyclonic areas (C2/N4 up to 5.5m).

*not all doors compatible. Please refer to our wind rated brochures for each door type.

A2000 Hingeway Counterweight Balanced Door.

Commercial and Industrial Doors

Steel-Line offer a range of commercial and industrial closures in partnership with Arco Architectural Systems and Max Door Solutions that combine strength and reliability. We offer high quality products, exceptional customer service and real value for money within the commercial and industrial space.

Our products are typically customised to suit project specific criteria. In particular, roller shutters and roller grilles are usually individually designed to suit architectural, ventilation and aesthetic requirements.

Steel-line and Arco Architectural Systems assist in all stages of the construction process - from design specifications through to estimating, project management, supervision of the installation and efficient after sales service.

NOTE:

- The colours and patterns shown in are provided as a guide only. Whilst we endeavour to get as close as possible, the limitations of printing processes make extremely accurate matches impossible. We strongly recommend comparing your choice with actual samples and discussing with your product consultant. Additionally, Steel-Line reserves the right to vary or delete colours without notice.

We're better together.
 We are **makers for life.**

At Steel-Line, we're not just makers and inventors of garage doors, we believe we are makers to the core.

We constantly strive to make things that don't just last a life-time but improve life. We are makers for life.

some things you can't control...

others you can.

HOME ENHANCERS

Coastal Upgrade Pack

Sectional Door Upgrade Pack includes Brush Seals, Powdercoated tracks and brackets and stainless steel cables.

Roller Door Upgrade Pack includes Brush Seals, AA Aluminium tracks with the no lock option.

The Coastal Upgrade Packs for both Sectional Doors and Roller Doors are recommended for all doors that are located within 5 kilometres from the sea to offer enhanced protection against the elements.

Photo Electric Beams

The Photo Electric Beam is designed to detect an obstruction while the door is closing and to send a signal to the opener to reverse or stop the door movement. It helps to protect your family from injury and your car from the damage caused by contact.

Wireless Keypad

The wireless keypad can be programmed with multiple, unique user codes. It is perfect for the family, trades people, or even just going for a walk. This means you can leave your keys at home with peace of mind.

Additional Handsets

Key ring remote transmitters are small and convenient with the ability to operate up to four doors or gates from the one unit. A must have for every set of keys in the house.

Brush Seal

A tough and durable brush seal can help better protect your garage from the elements and satisfies the "Construction of buildings in bushfire-prone areas" standard AS3959:2018 for protecting against fire embers entering the garage.

powermesh

simply safer

Control your garage door anytime, anywhere with the Powermesh home automation system. For more information see page 8-9.

For the latest news and updates see steel-line.com.au.

Powermesh products work with the Zimi home ecosystem. Make your life easier and get connected today. www.zimi.life

Battery Backup

A battery backup provides an energy supply in the event of a power cut.

Available for SD800, SD1200, RD800 and RD1200 motors, as well as the Marantec Comfort 380.

Emergency Key Release

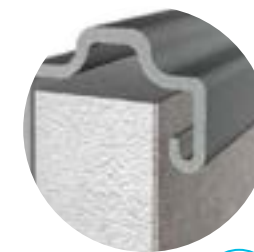

Used in case of malfunction or power failure, especially useful if there is no other access to the garage.

Wireless Wall Mounted Remote

Can be installed near an internal access door to your garage giving you greater convenience to open and close your garage door.

Garage Door Insulation

Steel-Line garage door insulation minimises the effects of the harsh Australian climate, by reducing heat loss and heat gain transferring through the door panel.

Only available with Colorbond Sectional/Smooth and Powdercoat doors.

Cut energy costs

Automatic locking system for your Garage Door.

Automatic Garage Door Deadbolt SD by Steel-Line

The Automatic Garage Door Deadbolt by Steel-Line provides convenience when it comes to entering and exiting your garage. With just the push of a button, you can open, close and lock your garage door with ease, saving you time and effort.

How it works?

The Automatic Garage Door Deadbolt by Steel-Line has been designed using advanced technology and will automatically engage when you close your door using your remote control.

The locking pin extends when the door reaches the closed position.

When opening, the locking pin will automatically retract, disengaging the deadbolt and allowing the door to raise to position.

Features

Set and forget. No regular charging or battery changing requirement

High quality, slim, attractive aesthetic enhances its sophisticated design

Effortless installation and integration with the Steel-Line SD motor range, with Marantec option available

Simple disengagement in the event of power failure

Engineered with the latest electronic technology

NOTE: Compatible with double or single sectional garage doors.

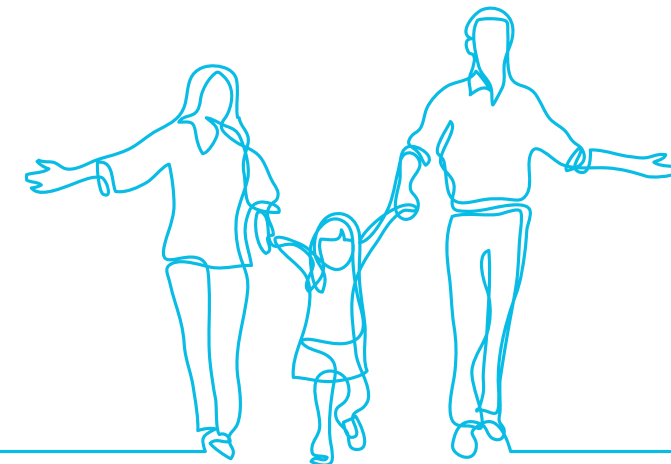

STEP FIVE: SELECT A SERVICE CARE PLAN

Service Care Plan

With a Steel-Line Garage Door Service Plan you can enjoy peace of mind for less with our 3 and 5 year service plans at a much lower cost.

Reassurance will only cost one upfront payment and will ensure your door is always under warranty. Steel-Line Garage Doors has qualified Garage and Roller Door Service Technicians on-hand to service or repair your garage door.
